

Research Participants Wanted

Volunteers are needed to participate in a genetic research study on Parkinson's disease, cerebrovascular disease (also known as stroke), epilepsy, amyotrophic lateral sclerosis (ALS), transient ischemic attack (TIA), dementia, Alzheimer's or neurologically normal persons (those without a parent or sibling who has a neurological disorder).

Qualified participants will be required to give a one-time blood sample. Participation is completely confidential and data will be used for future research related to neurological disorders.

All participants will be required to provide:

- **Written consent**
- **Brief health history (questionnaire)**
- **One-time blood sample**

Participants will be financially compensated with a cash card valued at \$25.00

Yes **No** I have completed grade 8 or above

Yes **No** I have no family history (parent or sibling) with a history of stroke, epilepsy, ALS, TIA, dementia, Alzheimer's or Parkinson's disease

Yes **No** I am not Caucasian and I have a personal history of stroke, epilepsy, ALS, TIA, dementia, Alzheimer's or Parkinson's disease

**For more information,
please call 219-877-1985.**

Staff from the Clinical Research Center will be on site during the ArcelorMittal Family Health and Safety Fair, July, 12, 2008.
